

Course code: .....

Plan position: .....

## A. INFORMATION ABOUT THE COURSE

### B. Basic information

|   |  |
|---|--|
| Name of course                            | <b><i>Physical Chemistry</i></b>   |
| Field of studies                          | Chemical Technology  |
| Level of studies                          | First degree   |
| Profile of studies                        | General academic   |
| Form of studies                           | Stationary   |
| Specialty                                 | 1. Chemical process technology<br>2. Bioengineering<br>3. Chemistry and technology of cosmetics                  |
| Unit responsible for the field of studies | Faculty of Chemical Technology and Engineering/ Division of Chemical Technology of Physicochemistry of Materials |
| Name and academic degree of teacher(s)    | Beata Jędrzejewska, PhD, DSc   |
| Introductory courses                      | General chemistry, mathematics, physics  |
| Introductory requirements                 | Knowledge of the basics of calculations, knowledge of the physical and chemical properties of substances         |

### C. Semester/week schedule of classes

| Semester | Lectures<br>(W) | Auditorium<br>classes<br>(Ć) | Laboratory<br>classes<br>(L) | Project<br>classes<br>(P) | Seminar<br>(S) | Field<br>classes<br>(T) | Number<br>of ECTS<br>points |
|----------|-----------------|------------------------------|------------------------------|---------------------------|----------------|-------------------------|-----------------------------|
| winter   | 45 <sup>E</sup> | 30                           |                              |                           |                |                         | 7                           |
| summer   | 30 <sup>E</sup> |                              | 60                           |                           |                |                         | 8                           |

## 2. LEARNING OUTCOME

| No.              | Learning outcomes description   | The reference<br>to the<br>learning<br>outcomes of<br>specific field<br>of study | The reference<br>to the<br>learning<br>outcomes for<br>the area |
|------------------|---|--|---|
| <b>KNOWLEDGE</b> |   |  |   |
| W1               | Has a structured, theoretically underpinned general knowledge of chemistry.                           | K_W03  | P6S_WG  |
| W2               | Has knowledge of techniques and methods for characterisation and identification of chemical products. | K_W11  | P6S_WG  |
| W3               | Knows the basics of kinetics of chemical processes including biochemistry and thermodynamics.         | K_W10  | P6S_WG  |
| <b>SKILLS</b>    |   |  |   |
| U1               | Works individually and as part of a team.   | K_U02  | P6S_UO<br>P6S_UK  |
| U2               | Performs chemical experiments, investigates chemical processes and interprets the results obtained.   | K_U06  | P6S_UW  |

|                           |   |       |                  |
|---------------------------|---|-------|------------------|
| U3                        | Determines the physical and chemical properties of materials.                     | K_U12 | P6S_UW           |
| U4                        | Respects health and safety rules related to the work to be performed.             | K_U14 | P6S_UW           |
| <b>SOCIAL COMPETENCES</b> |   |       |                  |
| K1                        | Is aware of the responsibility for jointly carried out tasks related to teamwork. | K_K04 | P6S_KK<br>P6S_KO |

### 3. TEACHING METHODS

#### A. Traditional methods used

Lectures, video presentations, classes exercises, laboratory work under teacher's supervision.

### 4. METHODS OF EXAMINATION

Lecture – written exam/test (minimum 50% of correct answers) or written assignment on the subject of the lectures, classes – written assignment, laboratory – passing a test (at least 50% of correct answers), performing the exercises provided in the schedule and processing the obtained results in the form of reports.

### 5. SCOPE

|              |  |
|--------------|--|
| Lectures     | Basic concepts of thermodynamics, work, heat, temperature. The 1 <sup>st</sup> , 2 <sup>nd</sup> and 3 <sup>rd</sup> laws of thermodynamics. Hess's law. Kirchoff's law. Conditions of spontaneous processes. Free energy and free enthalpy. Properties of gases, ideal gas, real gas; Adsorption - physisorption and chemisorption and their characteristics. Partition coefficient. Surface tension. Viscosity; Colligative properties of solution such as vapour pressure, freezing point, boiling point, and osmotic pressure. Raoult's law; Systems, phases, constituents and variance. One- and two-components phase diagram; Rate of a chemical reactions. Factors affecting the rate of reaction. Integrated rate laws of simple reactions. The kinetics of complex reactions; Electrochemistry - redox reactions, conductance in electrolytic solutions, electrochemical cells. |
| Classes      | Classes will illustrate the lecture topics and will introduce students to physical chemistry calculations.<br>Calculations of the heat of chemical reactions, enthalpy, entropy; Calculations of ideal gas properties, vapor pressure, boiling point elevation, freezing point depression, osmotic pressure; Chemical equilibrium calculations. Reaction rate constant. Concentration, pH and pK calculations.   |
| Laboratories | The exercises are selected by the lecturer, the exercises concern the issues discussed during the lectures.<br>Experiments: Partition coefficient of acetic acid; Refraction of solutions; Temperature influence on viscosity of glycerine; Surface tension of organic compounds; Identification of organic compound after determining its molecular weight; Adsorption of methylene blue on aluminum oxide in solution; Phase diagram of liquid-gas for two-component (binary) solution; Equilibrium constant of an indicator; Kinetics of saccharose inversion; Conductance of weak electrolytes; Conductometric titration; Potentiometric titration; Thermal analysis. Liquid-solid phase diagrams, simple eutectics.   |

### 6. METHODS OF VERIFICATION OF LEARNING OUTCOMES

| LEARNING OUTCOME | Form of assessment |              |            |         |              |        |
|------------------|--------------------|--------------|------------|---------|--------------|--------|
|                  | Oral examination   | Written exam | Colloquium | Project | Presentation | Report |
| W1               |                    | x            | x          |         |              | x      |
| W2               |                    |              | x          |         |              | x      |

|    |  |   |   |  |  |   |
|----|--|---|---|--|--|---|
| W3 |  | x | x |  |  |   |
| U1 |  |   |   |  |  | x |
| U2 |  |   | x |  |  | x |
| U3 |  |   | x |  |  | x |
| U4 |  |   | x |  |  |   |
| K1 |  | x | x |  |  | x |

## 7. LITERATURE

|                          |   |
|--------------------------|---|
| Basic literature         | <ol style="list-style-type: none"> <li>1. Atkins P.W., Paula J., 2006. Physical Chemistry. 8<sup>th</sup> ed. Freeman. New York.</li> <li>2. Whittaker A.G., Mount A.R., Heal M.R., 2000. Physical chemistry. BIOS Scientific.</li> <li>3. Mortimer R.G., 2005. Mathematics for Physical Chemistry (3<sup>rd</sup> ed.). Academic Press.</li> <li>4. Levine I. N., 2008. Physical chemistry. 6<sup>th</sup>ed. McGraw-Hill.</li> <li>5. Garland C.W., Nibler J.W., Shoemaker D.P., 2009. Experiments in Physical Chemistry. 8<sup>th</sup> ed. Boston: McGraw-Hill Higher Education.</li> </ol> |
| Supplementary literature | <ol style="list-style-type: none"> <li>1. Halpern A.M., 2006. Experimental Physical Chemistry, 2<sup>nd</sup> ed. Macmillan. Sime R.J., 1990. Physical chemistry: methods, techniques, and experiments. Saunders College Pub.</li> <li>2. Monk P.M.S., 2004. Physical chemistry: understanding our chemical world. John Wiley and Sons.</li> <li>3. White J.M., 1975. Physical Chemistry Laboratory Experiments. Prentice Hall.</li> </ol>  |

## 8. TOTAL STUDENT WORKLOAD REQUIRED TO ACHIEVE EXPECTED LEARNING OUTCOMES EXPRESSED IN TIME AND ECTS CREDITS

| Student's activity   |  | Student workload–<br>number of hours |
|--|--|--------------------------------------|
| Classes conducted under a direct supervision of an academic teacher or other persons responsible for classes | Participation in classes indicated in point 1B                   | 165                                  |
|  | Supervision hours  | 50                                   |
| Student's own work   | Preparation for classes  | 60                                   |
|  | Reading assignments  | 50                                   |
|  | Other (preparation for exams, tests, carrying out a project etc) | 50                                   |
| Total student workload   |  | 375                                  |
| Number of ECTS points  |  | <b>15</b>                            |
